

# Pacing Guide

- Build Understanding
- Connect Concepts and Skills
- Apply and Practice

Lesson	Mathematics Standards, Grade 2	Pacing
<b>Unit 1 NUMBERS TO 20 AND DATA</b>		
<b>Module 1: Fluency for Addition and Subtraction Within 20</b>		
Lesson 1.1 Use Doubles Facts to Add	■ Fluently add and subtract within 20 using mental strategies. By the end of Grade 2, know from memory all sums of two one-digit numbers.	1 day
Lesson 1.2 Develop Fluency with Addition Using Mental Strategies and Properties	■ Fluently add and subtract within 20 using mental strategies. By the end of Grade 2, know from memory all sums of two one-digit numbers.	2 days
Lesson 1.3 Relate Addition and Subtraction	■ Fluently add and subtract within 20 using mental strategies. By the end of Grade 2, know from memory all sums of two one-digit numbers.	1 day
Lesson 1.4 Develop Fluency with Subtraction Using Mental Strategies	■ Fluently add and subtract within 20 using mental strategies. By the end of Grade 2, know from memory all sums of two one-digit numbers.	2 days
Lesson 1.5 Use the Make a Ten Strategy to Add	■ Fluently add and subtract within 20 using mental strategies. By the end of Grade 2, know from memory all sums of two one-digit numbers.	1 day
Lesson 1.6 Use a Tens Fact to Subtract	■ Fluently add and subtract within 20 using mental strategies. By the end of Grade 2, know from memory all sums of two one-digit numbers.	1 day
Lesson 1.7 Add 3 Numbers Using Mental Strategies and Properties	■ Fluently add and subtract within 20 using mental strategies. By the end of Grade 2, know from memory all sums of two one-digit numbers.	1 day
<b>Module 2: Equal Groups</b>		
Lesson 2.1 Identify Even and Odd Numbers	□ Determine whether a group of objects (up to 20) has an odd or even number of members, e.g., by pairing objects or counting them by 2s; write an equation to express an even number as a sum of two equal addends.	1 day
Lesson 2.2 Write Equations to Represent Even Numbers	□ Determine whether a group of objects (up to 20) has an odd or even number of members, e.g., by pairing objects or counting them by 2s; write an equation to express an even number as a sum of two equal addends.	1 day
Lesson 2.3 Represent Equal Groups	□ Use addition to find the total number of objects arranged in rectangular arrays with up to 5 rows and up to 5 columns; write an equation to express the total as a sum of equal addends.	1 day
Lesson 2.4 Add to Find the Total Number of Objects in Arrays	□ Use addition to find the total number of objects arranged in rectangular arrays with up to 5 rows and up to 5 columns; write an equation to express the total as a sum of equal addends.	1 day
Lesson 2.5 Practice with Arrays	□ Use addition to find the total number of objects arranged in rectangular arrays with up to 5 rows and up to 5 columns; write an equation to express the total as a sum of equal addends.	1 day

- Major
- Supporting
- Additional

In addition to the core instructional pacing, HMH recommends the following:

- 3 days per year for the Growth Measure assessments
  - 2 days per module for the Module Opener, Are You Ready?, Module Review, and Module Test
  - 1 day per unit for the Performance Task
- Using these recommendations, the total pacing for Grade 2 is 181 days.

Lesson	Mathematics Standards, Grade 2	Pacing
<b>Module 3: Data</b>		
Lesson 3.1 Collect and Record Data	<span style="color: blue;">□</span> Draw a picture graph and a bar graph (with single-unit scale) to represent a data set with up to four categories. Solve simple put-together, take-apart, and compare problems using information presented in a bar graph.	1 day
Lesson 3.2 Interpret Picture Graph	<span style="color: blue;">□</span> Draw a picture graph and a bar graph (with single-unit scale) to represent a data set with up to four categories. Solve simple put-together, take-apart, and compare problems using information presented in a bar graph.	1 day
Lesson 3.3 Draw Picture Graphs to Represent Data	<span style="color: blue;">□</span> Draw a picture graph and a bar graph (with single-unit scale) to represent a data set with up to four categories. Solve simple put-together, take-apart, and compare problems using information presented in a bar graph.	1 day
Lesson 3.4 Interpret Bar Graphs	<span style="color: blue;">□</span> Draw a picture graph and a bar graph (with single-unit scale) to represent a data set with up to four categories. Solve simple put-together, take-apart, and compare problems using information presented in a bar graph.	1 day
Lesson 3.5 Draw Bar Graphs to Represent Data	<span style="color: blue;">□</span> Draw a picture graph and a bar graph (with single-unit scale) to represent a data set with up to four categories. Solve simple put-together, take-apart, and compare problems using information presented in a bar graph.	1 day

Lesson	Mathematics Standards, Grade 2	Pacing
<b>Unit 2 PLACE VALUE</b>		
<b>Module 4: Understand Place Value</b>		
Lesson 4.1 Group Tens as Hundreds	<ul style="list-style-type: none"> <li><span style="color: green;">■</span> 100 can be thought of as a bundle of ten tens—called a “hundred.”</li> <li><span style="color: green;">■</span> The numbers 100, 200, 300, 400, 500, 600, 700, 800, 900 refer to one, two, three, four, five, six, seven, eight, or nine hundreds (and 0 tens and 0 ones).</li> </ul>	1 day
Lesson 4.2 Understand Three-Digit Numbers	<span style="color: green;">■</span> Understand that the three digits of a three-digit number represent amounts of hundreds, tens, and ones.	1 day
Lesson 4.3 Represent Three-Digit Numbers	<span style="color: green;">■</span> Understand that the three digits of a three-digit number represent amounts of hundreds, tens, and ones.	1 day
Lesson 4.4 Represent Numbers with Hundreds, Tens, and Ones	<ul style="list-style-type: none"> <li><span style="color: green;">■</span> Understand that the three digits of a three-digit number represent amounts of hundreds, tens, and ones.</li> <li><span style="color: green;">■</span> Read and write numbers to 1000 using base-ten numerals, number names, and expanded form.</li> </ul>	1 day
Lesson 4.5 Place Value to 1,000	<span style="color: green;">■</span> Understand that the three digits of a three-digit number represent amounts of hundreds, tens, and ones.	1 day
<b>Module 5: Read, Write, and Show Numbers to 1,000</b>		
Lesson 5.1 Use Expanded Form	<span style="color: green;">■</span> Read and write numbers to 1000 using base-ten numerals, number names, and expanded form.	1 day
Lesson 5.2 Use Number Names	<span style="color: green;">■</span> Read and write numbers to 1000 using base-ten numerals, number names, and expanded form.	1 day
Lesson 5.3 Different Ways to Write Numbers	<span style="color: green;">■</span> Read and write numbers to 1000 using base-ten numerals, number names, and expanded form.	1 day
Lesson 5.4 Different Ways to Show Numbers	<span style="color: green;">■</span> Read and write numbers to 1000 using base-ten numerals, number names, and expanded form.	1 day
Lesson 5.5 Read, Write, and Show Numbers	<span style="color: green;">■</span> Read and write numbers to 1000 using base-ten numerals, number names, and expanded form.	1 day
<b>Module 6: Use Place Value</b>		
Lesson 6.1 Count Within 1,000	<span style="color: green;">■</span> Count within 1000; skip-count by 5s, 10s, and 100s.	1 day
Lesson 6.2 Add and Subtract 10 or 100	<span style="color: green;">■</span> Mentally add 10 or 100 to a given number 100–900, and mentally subtract 10 or 100 from a given number 100–900.	1 day
Lesson 6.3 Identify and Extend Number Patterns	<span style="color: green;">■</span> Mentally add 10 or 100 to a given number 100–900, and mentally subtract 10 or 100 from a given number 100–900.	1 day
Lesson 6.4 Compare Three-Digit Numbers	<span style="color: green;">■</span> Compare two three-digit numbers based on meanings of the hundreds, tens, and ones digits, using $>$ , $=$ , and $<$ symbols to record the results of comparisons.	1 day
Lesson 6.5 Use Symbols to Compare Numbers	<span style="color: green;">■</span> Compare two three-digit numbers based on meanings of the hundreds, tens, and ones digits, using $>$ , $=$ , and $<$ symbols to record the results of comparisons.	1 day

Lesson	Mathematics Standards, Grade 2	Pacing
<b>Unit 3 MONEY AND TIME</b>		
<b>Module 7: Coins</b>		
Lesson 7.1 Relate Place Value to Coins	<input type="checkbox"/> Solve word problems involving dollar bills, quarters, dimes, nickels, and pennies, using \$ and ¢ symbols appropriately. Example: If you have 2 dimes and 3 pennies, how many cents do you have?	1 day
Lesson 7.2 Identify and Find the Value of Coins	<input type="checkbox"/> Solve word problems involving dollar bills, quarters, dimes, nickels, and pennies, using \$ and ¢ symbols appropriately. Example: If you have 2 dimes and 3 pennies, how many cents do you have?	2 days
Lesson 7.3 Compute the Value of Coin Combinations	<input type="checkbox"/> Solve word problems involving dollar bills, quarters, dimes, nickels, and pennies, using \$ and ¢ symbols appropriately. Example: If you have 2 dimes and 3 pennies, how many cents do you have?	1 day
Lesson 7.4 Show Amounts in Different Ways	<input type="checkbox"/> Solve word problems involving dollar bills, quarters, dimes, nickels, and pennies, using \$ and ¢ symbols appropriately. Example: If you have 2 dimes and 3 pennies, how many cents do you have?	2 days
<b>Module 8: Dollar Amounts</b>		
Lesson 8.1 Relate the Value of Coins to One Dollar	<input type="checkbox"/> Solve word problems involving dollar bills, quarters, dimes, nickels, and pennies, using \$ and ¢ symbols appropriately. Example: If you have 2 dimes and 3 pennies, how many cents do you have?	1 day
Lesson 8.2 Compute the Value of Dollar Combinations	<input type="checkbox"/> Solve word problems involving dollar bills, quarters, dimes, nickels, and pennies, using \$ and ¢ symbols appropriately. Example: If you have 2 dimes and 3 pennies, how many cents do you have?	1 day
Lesson 8.3 Solve Problems Involving Money	<input type="checkbox"/> Solve word problems involving dollar bills, quarters, dimes, nickels, and pennies, using \$ and ¢ symbols appropriately. Example: If you have 2 dimes and 3 pennies, how many cents do you have?	2 days

Lesson	Mathematics Standards, Grade 2	Pacing
<b>Module 9: Time</b>		
Lesson 9.1 Tell and Write Time to 5 Minutes	<input type="checkbox"/> Tell and write time from analog and digital clocks to the nearest five minutes, using a.m. and p.m.	1 day
Lesson 9.2 Different Ways to Tell and Write Time	<input type="checkbox"/> Tell and write time from analog and digital clocks to the nearest five minutes, using a.m. and p.m.	2 days
Lesson 9.3 Practice Telling and Writing Time	<input type="checkbox"/> Tell and write time from analog and digital clocks to the nearest five minutes, using a.m. and p.m.	1 day
Lesson 9.4 Tell and Write Time with A.M. and P.M.	<input type="checkbox"/> Tell and write time from analog and digital clocks to the nearest five minutes, using a.m. and p.m.	1 day

Lesson	Mathematics Standards, Grade 2	Pacing
<b>Unit 4 TWO-DIGIT ADDITION AND SUBTRACTION</b>		
<b>Module 10: Addition and Subtraction Counting Strategies</b>		
Lesson 10.1 Use a Hundred Chart	<ul style="list-style-type: none"> <li>Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.</li> <li>Add up to four two-digit numbers using strategies based on place value and properties of operations.</li> </ul>	1 day
Lesson 10.2 Use a Number Line	<ul style="list-style-type: none"> <li>Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.</li> <li>Add up to four two-digit numbers using strategies based on place value and properties of operations.</li> </ul>	1 day
Lesson 10.3 Practice Counting Strategies	<ul style="list-style-type: none"> <li>Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.</li> <li>Add up to four two-digit numbers using strategies based on place value and properties of operations.</li> </ul>	1 day
<b>Module 11: Addition and Subtraction Grouping Strategies</b>		
Lesson 11.1 Decompose Ones to Add	<ul style="list-style-type: none"> <li>Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.</li> </ul>	1 day
Lesson 11.2 Decompose Ones to Subtract	<ul style="list-style-type: none"> <li>Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.</li> </ul>	1 day
Lesson 11.3 Decompose Numbers to Add	<ul style="list-style-type: none"> <li>Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.</li> </ul>	1 day
Lesson 11.4 Decompose Addends as Tens and Ones	<ul style="list-style-type: none"> <li>Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.</li> </ul>	1 day
Lesson 11.5 Decompose Numbers to Subtract	<ul style="list-style-type: none"> <li>Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.</li> </ul>	1 day

Lesson	Mathematics Standards, Grade 2	Pacing
<b>Module 12: Represent and Record Addition and Subtraction</b>		
Lesson 12.1 Represent Regrouping for Addition	<ul style="list-style-type: none"> <li><span style="color: green;">■</span> Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.</li> </ul>	1 day
Lesson 12.2 Represent Regrouping for Subtraction	<ul style="list-style-type: none"> <li><span style="color: green;">■</span> Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.</li> </ul>	1 day
Lesson 12.3 Represent and Record Two-Digit Addition	<ul style="list-style-type: none"> <li><span style="color: green;">■</span> Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.</li> </ul>	2 days
Lesson 12.4 Represent and Record Two-Digit Subtraction	<ul style="list-style-type: none"> <li><span style="color: green;">■</span> Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.</li> </ul>	2 days
Lesson 12.5 Add Two-Digit Numbers	<ul style="list-style-type: none"> <li><span style="color: green;">■</span> Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.</li> <li><span style="color: green;">■</span> Explain why addition and subtraction strategies work, using place value and the properties of operations.</li> </ul>	1 day
Lesson 12.6 Subtract Two-Digit Numbers	<ul style="list-style-type: none"> <li><span style="color: green;">■</span> Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.</li> <li><span style="color: green;">■</span> Explain why addition and subtraction strategies work, using place value and the properties of operations.</li> </ul>	1 day
<b>Module 13: Develop Addition and Subtraction Fluency</b>		
Lesson 13.1 Rewrite Addition Problems	<ul style="list-style-type: none"> <li><span style="color: green;">■</span> Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.</li> </ul>	1 day
Lesson 13.2 Rewrite Subtraction Problems	<ul style="list-style-type: none"> <li><span style="color: green;">■</span> Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.</li> </ul>	1 day
Lesson 13.3 Use Addition and a Number Line to Subtract	<ul style="list-style-type: none"> <li><span style="color: green;">■</span> Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.</li> </ul>	1 day

Lesson	Mathematics Standards, Grade 2	Pacing
<b>Module 13: Develop Addition and Subtraction Fluency</b>		
Lesson 13.4 Add 3 Two-Digit Numbers Using Strategies and Properties	<ul style="list-style-type: none"> <li>■ Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.</li> <li>■ Add up to four two-digit numbers using strategies based on place value and properties of operations.</li> <li>■ Add and subtract within 1000, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method. Understand that in adding or subtracting three-digit numbers, one adds or subtracts hundreds and hundreds, tens and tens, ones and ones; and sometimes it is necessary to compose or decompose tens or hundreds.</li> <li>■ Explain why addition and subtraction strategies work, using place value and the properties of operations.</li> </ul>	2 days
Lesson 13.5 Add 4 Two-Digit Numbers Using Strategies and Properties	<ul style="list-style-type: none"> <li>■ Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.</li> <li>■ Add up to four two-digit numbers using strategies based on place value and properties of operations.</li> <li>■ Add and subtract within 1000, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method. Understand that in adding or subtracting three-digit numbers, one adds or subtracts hundreds and hundreds, tens and tens, ones and ones; and sometimes it is necessary to compose or decompose tens or hundreds.</li> <li>■ Explain why addition and subtraction strategies work, using place value and the properties of operations.</li> </ul>	2 days
<b>Module 14: Algebra</b>		
Lesson 14.1 Use Drawings to Represent Addition and Subtraction Situations	<ul style="list-style-type: none"> <li>■ Use addition and subtraction within 100 to solve one- and two-step word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.</li> </ul>	2 days
Lesson 14.2 Use Equations to Represent Addition and Subtraction Situations	<ul style="list-style-type: none"> <li>■ Use addition and subtraction within 100 to solve one- and two-step word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.</li> </ul>	2 days

Lesson	Mathematics Standards, Grade 2	Pacing
<b>Module 14: Algebra</b>		
Lesson 14.3 Use Drawings and Equations to Represent Two-Digit Addition	■ Use addition and subtraction within 100 to solve one- and two-step word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.	2 days
Lesson 14.4 Use Drawings and Equations to Represent Two-Digit Subtraction	■ Use addition and subtraction within 100 to solve one- and two-step word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.	2 days
<b>Module 15: Addition and Subtraction Word Problems</b>		
Lesson 15.1 Solve Addition Word Problems	■ Use addition and subtraction within 100 to solve one- and two-step word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.	1 day
Lesson 15.2 Solve Subtraction Word Problems	■ Use addition and subtraction within 100 to solve one- and two-step word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.	1 day
Lesson 15.3 Solve Multistep Addition and Subtraction Problems	■ Use addition and subtraction within 100 to solve one- and two-step word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.	2 days

Lesson	Mathematics Standards, Grade 2	Pacing
<b>Unit 5 THREE-DIGIT ADDITION AND SUBTRACTION</b>		
<b>Module 16: Three-Digit Addition</b>		
Lesson 16.1 Use Drawings to Represent Three-Digit Addition	■ Add and subtract within 1,000, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method. Understand that in adding or subtracting three-digit numbers, one adds or subtracts hundreds and hundreds, tens and tens, ones and ones; and sometimes it is necessary to compose or decompose tens or hundreds.	1 day
Lesson 16.2 Decompose Three-Digit Addends	■ Add and subtract within 1,000, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method. Understand that in adding or subtracting three-digit numbers, one adds or subtracts hundreds and hundreds, tens and tens, ones and ones; and sometimes it is necessary to compose or decompose tens or hundreds.	1 day
Lesson 16.3 Represent Regrouping for Addition	■ Add and subtract within 1,000, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method. Understand that in adding or subtracting three-digit numbers, one adds or subtracts hundreds and hundreds, tens and tens, ones and ones; and sometimes it is necessary to compose or decompose tens or hundreds.	1 day
Lesson 16.4 Add Three-Digit Numbers	■ Add and subtract within 1,000, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method. Understand that in adding or subtracting three-digit numbers, one adds or subtracts hundreds and hundreds, tens and tens, ones and ones; and sometimes it is necessary to compose or decompose tens or hundreds.	1 day
<b>Module 17: Three-Digit Subtraction</b>		
Lesson 17.1 Represent Three-Digit Subtraction	■ Add and subtract within 1000, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method. Understand that in adding or subtracting three-digit numbers, one adds or subtracts hundreds and hundreds, tens and tens, ones and ones; and sometimes it is necessary to compose or decompose tens or hundreds.	1 day

Lesson	Mathematics Standards, Grade 2	Pacing
<b>Module 17: Three-Digit Subtraction</b>		
Lesson 17.2 Represent Regrouping for Subtraction	<ul style="list-style-type: none"> <li>■ Add and subtract within 1000, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method. Understand that in adding or subtracting three-digit numbers, one adds or subtracts hundreds and hundreds, tens and tens, ones and ones; and sometimes it is necessary to compose or decompose tens or hundreds.</li> </ul>	1 day
Lesson 17.3 Subtract Three-Digit Numbers	<ul style="list-style-type: none"> <li>■ Add and subtract within 1000, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method. Understand that in adding or subtracting three-digit numbers, one adds or subtracts hundreds and hundreds, tens and tens, ones and ones; and sometimes it is necessary to compose or decompose tens or hundreds.</li> </ul>	1 day
Lesson 17.4 Represent Regrouping with Zeros	<ul style="list-style-type: none"> <li>■ Add and subtract within 1000, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method. Understand that in adding or subtracting three-digit numbers, one adds or subtracts hundreds and hundreds, tens and tens, ones and ones; and sometimes it is necessary to compose or decompose tens or hundreds.</li> </ul>	1 day
Lesson 17.5 Regrouping with Zeros	<ul style="list-style-type: none"> <li>■ Add and subtract within 1000, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method. Understand that in adding or subtracting three-digit numbers, one adds or subtracts hundreds and hundreds, tens and tens, ones and ones; and sometimes it is necessary to compose or decompose tens or hundreds.</li> </ul>	1 day
Lesson 17.6 Add and Subtract Three-Digit Numbers	<ul style="list-style-type: none"> <li>■ Add and subtract within 1000, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method. Understand that in adding or subtracting three-digit numbers, one adds or subtracts hundreds and hundreds, tens and tens, ones and ones; and sometimes it is necessary to compose or decompose tens or hundreds.</li> <li>■ Explain why addition and subtraction strategies work, using place value and the properties of operations.</li> </ul>	1 day

Lesson	Mathematics Standards, Grade 2	Pacing
<b>Unit 6 MEASUREMENT: LENGTH</b>		
<b>Module 18: Length in Inches, Feet, and Yards</b>		
Lesson 18.1 Estimate Lengths Using Inches	■ Estimate lengths using units of inches, feet, centimeters, and meters.	1 day
Lesson 18.2 Make and Use a Ruler	■ Measure the length of an object by selecting and using appropriate tools such as rulers, yardsticks, meter sticks, and measuring tapes.	2 days
Lesson 18.3 Measure to the Nearest Inch	■ Measure the length of an object by selecting and using appropriate tools such as rulers, yardsticks, meter sticks, and measuring tapes.	1 day
Lesson 18.4 Make Line Plots to Show Measurement Data	□ Generate measurement data by measuring lengths of several objects to the nearest whole unit, or by making repeated measurements of the same object. Show the measurements by making a line plot, where the horizontal scale is marked off in whole-number units.	2 days
Lesson 18.5 Estimate Lengths Using Feet	■ Estimate lengths using units of inches, feet, centimeters, and meters.	1 day
Lesson 18.6 Measure in Inches and Feet	■ Measure the length of an object twice, using length units of different lengths for the two measurements; describe how the two measurements relate to the size of the unit chosen.	1 day
Lesson 18.7 Measure to the Nearest Yard	■ Measure the length of an object by selecting and using appropriate tools such as rulers, yardsticks, meter sticks, and measuring tapes.	2 days
Lesson 18.8 Choose Appropriate Tools	■ Measure the length of an object by selecting and using appropriate tools such as rulers, yardsticks, meter sticks, and measuring tapes.	1 day
<b>Module 19: Length in Centimeters and Meters</b>		
Lesson 19.1 Estimate Lengths Using Centimeters	■ Estimate lengths using units of inches, feet, centimeters, and meters.	1 day
Lesson 19.2 Measure to the Nearest Centimeter	■ Measure the length of an object by selecting and using appropriate tools such as rulers, yardsticks, meter sticks, and measuring tapes.	1 day
Lesson 19.3 Estimate Lengths Using Meters	■ Estimate lengths using units of inches, feet, centimeters, and meters.	1 day
Lesson 19.4 Measure in Centimeters and Meters	■ Measure the length of an object twice, using length units of different lengths for the two measurements; describe how the two measurements relate to the size of the unit chosen.	1 day

Lesson	Mathematics Standards, Grade 2	Pacing
<b>Module 20: Relate Addition and Subtraction to Length</b>		
Lesson 20.1 Relate Inches to a Number Line	<ul style="list-style-type: none"> <li>■ Represent whole numbers as lengths from 0 on a number line diagram with equally spaced points corresponding to the numbers 0, 1, 2, . . . , and represent whole-number sums and differences within 100 on a number line diagram.</li> </ul>	1 day
Lesson 20.2 Add and Subtract Lengths in Inches	<ul style="list-style-type: none"> <li>■ Use addition and subtraction within 100 to solve word problems involving lengths that are given in the same units, e.g., by using drawings (such as drawings of rulers) and equations with a symbol for the unknown number to represent the problem.</li> <li>■ Represent whole numbers as lengths from 0 on a number line diagram with equally spaced points corresponding to the numbers 0, 1, 2, . . . , and represent whole-number sums and differences within 100 on a number line diagram.</li> </ul>	1 day
Lesson 20.3 Relate Centimeters to a Number Line	<ul style="list-style-type: none"> <li>■ Represent whole numbers as lengths from 0 on a number line diagram with equally spaced points corresponding to the numbers 0, 1, 2, . . . , and represent whole-number sums and differences within 100 on a number line diagram.</li> </ul>	1 day
Lesson 20.4 Add and Subtract Lengths in Centimeters	<ul style="list-style-type: none"> <li>■ Use addition and subtraction within 100 to solve word problems involving lengths that are given in the same units, e.g., by using drawings (such as drawings of rulers) and equations with a symbol for the unknown number to represent the problem.</li> <li>■ Represent whole numbers as lengths from 0 on a number line diagram with equally spaced points corresponding to the numbers 0, 1, 2, . . . , and represent whole-number sums and differences within 100 on a number line diagram.</li> </ul>	1 day
Lesson 20.5 Measure and Compare Lengths in Centimeters	<ul style="list-style-type: none"> <li>■ Measure to determine how much longer one object is than another, expressing the length difference in terms of a standard length unit.</li> </ul>	1 day

Lesson	Mathematics Standards, Grade 2	Pacing
<b>Unit 7 GEOMETRY AND FRACTIONS</b>		
<b>Module 21: Two- and Three-Dimensional Shapes</b>		
Lesson 21.1 Identify and Draw Three-Dimensional Shapes	● Recognize and draw shapes having specified attributes, such as a given number of angles or a given number of equal faces. Identify triangles, quadrilaterals, pentagons, hexagons, and cubes.	2 days
Lesson 21.2 Identify and Draw Two-Dimensional Shapes	● Recognize and draw shapes having specified attributes, such as a given number of angles or a given number of equal faces. Identify triangles, quadrilaterals, pentagons, hexagons, and cubes.	2 days
Lesson 21.3 Find and Count Angles in Two-Dimensional Shapes	● Recognize and draw shapes having specified attributes, such as a given number of angles or a given number of equal faces. Identify triangles, quadrilaterals, pentagons, hexagons, and cubes.	1 day
Lesson 21.4 Sort Two-Dimensional Shapes by Sides and Angles	● Recognize and draw shapes having specified attributes, such as a given number of angles or a given number of equal faces. Identify triangles, quadrilaterals, pentagons, hexagons, and cubes.	1 day
<b>Module 22: Understand Fractions</b>		
Lesson 22.1 Partition Rectangles	● Partition a rectangle into rows and columns of same-size squares and count to find the total number of them. ■ Use addition to find the total number of objects arranged in rectangular arrays with up to 5 rows and up to 5 columns; write an equation to express the total as a sum of equal addends.	1 day
Lesson 22.2 Identify and Describe Equal Shares	● Partition circles and rectangles into two, three, or four equal shares, describe the shares using the words <i>halves</i> , <i>thirds</i> , <i>half of</i> , <i>a third of</i> , etc., and describe the whole as two halves, three thirds, four fourths. Recognize that equal shares of identical wholes need not have the same shape.	2 days
Lesson 22.3 Draw Equal Shares	● Partition circles and rectangles into two, three, or four equal shares, describe the shares using the words <i>halves</i> , <i>thirds</i> , <i>half of</i> , <i>a third of</i> , etc., and describe the whole as two halves, three thirds, four fourths. Recognize that equal shares of identical wholes need not have the same shape.	1 day
Lesson 22.4 Show and Describe an Equal Share	● Partition circles and rectangles into two, three, or four equal shares, describe the shares using the words <i>halves</i> , <i>thirds</i> , <i>half of</i> , <i>a third of</i> , etc., and describe the whole as two halves, three thirds, four fourths. Recognize that equal shares of identical wholes need not have the same shape.	2 days
Lesson 22.5 Different Ways to Show Equal Shares	● Partition circles and rectangles into two, three, or four equal shares, describe the shares using the words <i>halves</i> , <i>thirds</i> , <i>half of</i> , <i>a third of</i> , etc., and describe the whole as two halves, three thirds, four fourths. Recognize that equal shares of identical wholes need not have the same shape.	1 day
